# MODERNES CSS

# MODERNES CSS – LAYOUT

Subgrid

grid-template-rows/-columns: subgrid

CSS Logical Properties

margin-block, margin-inline,...

aspect-ratio: 16 / 9

content-visibility: auto

gap property for flexbox

# MODERNES CSS – LAYOUT

Container Queries

@container, container-\*  
object-view-box

Small, large and dynamic viewport units  
svh, lvh, dvh, ...

Media Queries Range Context

@media (30em <= width < 50em)

# MODERNES CSS – LAYOUT

Anchor Positioning

anchor-name, anchor()

display: contents

# MODERNES CSS – GRAPHICS

mix-blend-mode: \*

CSS filter effects

filter: \*

backdrop-filter

Intrinsic sizing keywords

min-content, max-content, fit-content, fill

conic-gradient()

# MODERNES CSS – GRAPHICS

Linear easing function

```
linear(0, 0.009, 0.035 2.1%, 0.141, 0.281 6.7%,  
0.723 12.9%, 0.938 16.7%, 1.017, 1.077, 1.121,  
1.149 24.3%, 1.159, 1.163, 1.161, 1.154 29.9%,  
1.129 32.8%, 1.051 39.6%, 1.017 43.1%, 0.991,  
0.977 51%, 0.974 53.8%, 0.975 57.1%, 0.997  
69.8%, 1.003 76.9%, 1.004 83.8%, 1)
```

View Transition API

```
view-transition-name
```

# **MODERNES CSS – COLORS**

---

color(colorspace c1 c2 c3[ / A]))

accent-color

currentcolor

color-mix(method, color1[ p1], color2[ p2])

# **MODERNES CSS – COLORS**

---

Wide gamut colors

relative Farben

background-color: hsl(var(--theme-primary)  
h s 80%)

# **MODERNES CSS – INTERACTION**

---

Scroll snap

scroll-snap-type: x mandatory

overscroll-behavior

touch-action

scroll-behavior

scrollbar-gutter

# MODERNES CSS - TYPOGRAPHIE

Font display

`font-display: swap`

Line clamp

`line-clamp: 3`

Variable fonts

`font-palette`

Text wrap

`text-wrap: balance`

# MODERNES CSS - ACCESSIBILITY

```
@media (prefers-reduced-motion) {}
```

```
@media (prefers-color-scheme: dark) {}
```

```
@media (prefers-reduced-data: no-preference) {}
```

```
color-scheme
```

```
@media (prefers-contrast: more) {}
```

```
@media (forced-colors: active) {}
```

```
:focus-visible
```

# MODERNES CSS

CSS variables (custom properties)

`var(--*) ,`

`@supports`

CSS comparison functions

`clamp() , min() , max()`

`@property`

`::marker`

# MODERNES CSS

---

:has()

:where()

Cascade layers

Shadow DOM features

Trigonometric functions

width: calc(100px \* cos(0.785398163rad))

# MODERNES CSS

CSS nesting

Image-set()

Image()

Individual transform properties

:nth-child() with of <selector> syntax

# HOW TO USE

# **GRADED BROWSER SUPPORT**

---

## **A+ Support**

expliziter Vollsupport

## **A Support**

voll funktional (ggf. mit Abstrichen)

## **B Support**

funktionale Darstellung, bedienbar

## **No C Support**

kein expliziter Support, rudimentäre Darstellung  
sichergestellt

# **GRACEFUL DEGRADATION**

---

*Graceful degradation is a design philosophy that centers around trying to build a modern website/application that will work in the newest browsers, but falls back to an experience that while not as good still delivers essential content and functionality in older browsers.*

---

[https://developer.mozilla.org/en-US/docs/Glossary/Graceful\\_degradation](https://developer.mozilla.org/en-US/docs/Glossary/Graceful_degradation)

# GRACEFUL DEGRADATION

```
.my-selector {  
    -webkit-transition: all 4s ease;  
    -moz-transition: all 4s ease;  
    -ms-transition: all 4s ease;  
    -o-transition: all 4s ease;  
    transition: all 4s ease;  
}
```

# **PROGRESSIVE ENHANCEMENT**

---

*Progressive enhancement is a design philosophy that provides a baseline of essential content and functionality to as many users as possible, while delivering the best possible experience only to users of the most modern browsers that can run all the required code.*

---

[https://developer.mozilla.org/en-US/docs/Glossary/Progressive\\_Enhancement](https://developer.mozilla.org/en-US/docs/Glossary/Progressive_Enhancement)

# PROGRESSIVE ENHANCEMENT

---

```
.flex-container > * {  
    /* */  
    float: left;  
}  
  
@supports (display: flex) {  
    .flex-container > * {  
        float: none;  
    }  
  
    .flex-container {  
        display: flex;  
    }  
}
```

# INTEROP 2022 & 2023

*Interop 2022/23 is a cross-browser effort to improve the interoperability of the web — to reach a state where each technology works exactly the same in every browser.*
